

## Mystery #15 Any Size You Want – Precutting

### Size Options

Finished Block	3 inch	6 inch	9 inch	12 inch
Rectangles	1 1/2 x 2 1/2	2 1/2 x 4 1/2	3 1/2 x 6 1/2	4 1/2 x 8 1/2
Squares	1 1/2	2 1/2	3 1/2	4 1/2

As with most of my mysteries I will be showing how to make a 16 block project, however depending on which size block you picked, that could be anywhere from a wall hanging to a 48 inch square lap quilt. This project will work in any layout as there is not a design option at the end. You can make a rectangular quilt or square, even or odd rows.

Before you start cutting, you need to decide light or dark.

If you want a light background, then cut light squares and dark rectangles.

If you want a dark background, cut dark squares and light rectangles. Either way works.

Want to go half and half, then cut half light squares and half dark squares and half light rectangles and half dark rectangles.

Using the chart above to choose your block size, cut the **sixty-four rectangles** and **eighty squares**. If you want to make a larger project you may, once the mystery has been solved.
